

Amendments to the Specification:

Page 1, before line 3, the paragraph beginning with "The invention relates" insert the following titles and paragraph:

-- CROSS REFERENCE TO RELATED APPLICATIONS

This is a U.S. national stage of application No. PCT/EP2004/008126, filed on 21 July 2004. Priority is claimed on the following application(s): Country: Germany, Application No.: 103 35 230.9, Filed: 1 August 2003.

BACKGROUND OF THE INVENTION --

Please replace the paragraph beginning on page 1, line 3, with the following amended paragraph:

-- The invention relates to a method for producing RFID labels using a printing process, ~~according to the precharacterizing clause of claim 1.~~ --

Page 1, line 7, delete the title "[Prior Art]"

Please amend the title on page 2, line 18, as follows:

-- ~~{Object of the Invention}~~ **SUMMARY OF THE INVENTION** --

Please replace the paragraph beginning on page 2, line 24, with the following amended paragraph:

-- This object is achieved by a method for producing RFID labels in which at least a part of an entrance of the RFID label is applied to a printing material substrate by sheet-fed offset printing or by a relief printing plate ~~the characterizing features of claims 1 and 12.~~
~~Developments of the invention result from the respective subclaims.~~ --

Page 2, line 28, delete the title "[Examples]"

Page 2, before line 29, the paragraph beginning with "According to the invention", insert the following titles and paragraph:

-- BRIEF DESCRIPTION OF THE DRAWINGS

In the drawings:

Fig. 1 is a plan view of an RFID label produced according to the present invention;

Fig. 2 is a plan view of a capacitor produced according to an embodiment of the present invention; and

Fig. 3 is a side view of a capacitor produced according to another embodiment of the present invention.

DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENTS --

Please replace the paragraph beginning on page 2, line 29, with the following amended paragraph:

-- According to the invention, there is provision for at least parts of ~~the~~ an antenna and a tuned circuit ~~which is~~ required for functioning ~~and~~ of an RFID label ~~the tuned circuit~~ to be applied to ~~the~~ a printing material by sheet-fed offset printing, or for at least part of the antenna and the tuned circuit ~~which is~~ required for functioning ~~and~~ of the RFID label ~~tuned circuit~~ to be applied, directly or indirectly, by way of a relief printing plate. After printing, all that remains is for the chip which is usually not in a housing to be applied by an adhesive bonding or soldering process. --

Please replace the Abstract of Disclosure with the abstract as shown on a separate page attached hereto.
